

# Job Description: Full Stack Developer

## Overview

- We are seeking a Full Stack Developer to design, develop, and maintain scalable web applications.
- The role involves working across frontend, backend, and database layers.

## Key Responsibilities

- Develop user-facing features using modern frontend frameworks.
- Design and implement RESTful APIs.
- Integrate frontend components with backend services.
- Optimize application performance and scalability.
- Participate in code reviews and sprint planning.

## Required Technical Skills

- Strong proficiency in Java, Python, or JavaScript.
- Experience with React, Angular, or similar frameworks.
- Knowledge of SQL and NoSQL databases.
- Understanding of REST APIs and MVC architecture.
- Experience with Git version control.

## Professional Experience

- 1–3 years of experience in full stack development.
- Hands-on experience working on production applications.
- Exposure to Agile development methodologies.

## Soft Skills

- Strong problem-solving ability.
- Good communication and collaboration skills.
- Willingness to learn and adapt.
