Job Description: AI / ML Engineer

Overview

• We are hiring an AI/ML Engineer to build intelligent, data-driven solutions.

Key Responsibilities

• Develop and train machine learning models.

• Perform data preprocessing and feature engineering.

• Deploy ML models into production environments.

• Monitor and improve model performance.

Required Technical Skills

• Strong Python programming skills.

• Experience with ML libraries such as Scikit-learn or TensorFlow.

• Understanding of statistics and algorithms.

• Exposure to cloud-based ML services.

Professional Experience

• 1–3 years of experience in ML or data science roles.

• Experience working on real-world ML projects.

Soft Skills

• Analytical thinking.

• Curiosity and experimentation mindset.

• Clear communication of technical concepts.
